Conclusion & Key Insights

Major Findings

- ★ Players with higher overall ratings generally have higher market values.
- 💰 Market value and wages show a positive relationship.
- 🌍 A few countries contribute a large share of professional football players.
- ⚽ Different playing positions have distinct rating and value distributions.
- 🎯 Younger players often possess higher growth potential.

Project Summary

This dashboard demonstrates how interactive data visualization can help explore football player performance, market value, wages, and nationality trends.

By combining Streamlit and Plotly, users can filter players, compare statistics, and gain meaningful insights from the FIFA dataset through an intuitive and interactive interface.
